

CN-1

INV-1 · PO-1

Credited 1 FILTER-X	Against INV-1 DN-1 + DN-2	Order PO-1
---	---	----------------------

what this document says

Record	Description	Quantity
CN-1	Credit for 1 damaged unit(s) reported at receipt, against INV-1.	1

what it does not say

INV-1 is not edited. A supplier correction arrives as its own record, so the original invoice and the correction both stay readable afterwards. Quantities only: the exercise dataset carries no prices and none were invented here.

◆ Simulated document

Generated by the C04 prototype to stand in for a scan the facilitator would otherwise hand over. Nothing external was executed: no supplier was contacted, no inventory was updated and no accounting entry was made.
